

# New year, new you aesthetic makeover

**“Dr Milojevic is one of the UK’s leading aesthetic doctors and a key opinion leader, famed as an innovator of this non-surgical branch of aesthetics**

your lips will look like the most famous lips of the moment, whether that’s Meghan Markle or Kylie Jenner. Using dermal fillers, such as Restylane or Juvederm, you won’t be disappointed.

## **Obagi Nu-Derm medical creams and peels**

Too much sun damage in 2017? Did you get pigmentation during and after your recent pregnancy? These are the most common causes of melasma and pigmentation on the skin, and Obagi Nu-Derm is what Dr Milojevic says is “a kind of miracle for the skin”. These creams will wipe away any pigmentation — permanently. For flawless, smooth and rejuvenated skin with no pigmentation in 2018, these sophisticated medical creams and peels are the answer you’ve been looking for.

## **Dermal fillers for volume loss**

Has your skin lost its elasticity and started to sag? Have you started to look tired in 2017? This is probably due to the major factor of ageing, which causes volume loss in the face. Dr Milojevic refers to this as “the deflated balloon syndrome”. The solution is simple: by injecting hyaluronic acid fillers into areas such as the cheeks and jawline, the balloon is once again inflated — the skin becomes tight and youthful, and you can start your new year feeling young and confident.

## **Restylane vital skinboosters**

Dr Milojevic calls this ‘medical mesotherapy’. It’s an ideal treatment to wipe away the tired look your skin may have acquired during a stressful 2017, when pores may have increased, small wrinkles might have appeared around the eyes, and the skin maybe isn’t as tight and lifted as before. Skinbooster treatments are ideal for rejuvenating the skin, returning its old shine, wiping out scars, pores and wrinkles, and freshening it in the most natural way. The treatment is quick, easy and painless, and can be combined with dermal roller and dermastamp microneedling treatments to produce amazing results and rejuvenation.

## **Botox for wrinkles**

Botox injections are still the best way to wipe away frown lines, forehead lines and crow’s feet around the eyes. With new techniques

and low ‘baby Botox’ doses, Dr Milojevic can now accurately and naturally remove wrinkles, raise eyebrows, and give the eyes and whole face a fresh new look for the new year. Dr Milojevic is one of the most experienced Botox doctors in the UK, and not only will he remove your wrinkles painlessly and with no side effects, but he can also narrow your face, make the chin smaller, tighten the jawline using his famed ‘Nefertiti neck lift’, and even reduce your gummy smile. Whisper it quietly, as he gets very shy when it’s mentioned, but the UK media have often dubbed him: ‘the Botox king’, and for good reason.

## **Lips like Meghan Markle in 2018**

According to Dr Milojevic, these will be the most sought-after lips in 2018. Using his ‘heart shape’ technique, he can shape the lips in the most natural and sensual way, made-to-measure, so

**MILOCLINIC**

For lips like Meghan Markle in 2018, book an appointment at the Milo Clinic and quote ‘New Year New You’ to get a 25% discount (offer closes 30 April 2018).
